# Table of Contents

<b>Executive Summary .....</b>	<b>ES-1</b>
What Have We Learned From This Study?.....	ES-2
What Is King County's Current Reclaimed Water Program?.....	ES-6
What Needs to be Considered in Evaluating Reclaimed Water Projects? .....	ES-6
Where Are Potential Uses for Reclaimed Water?.....	ES-8
What Are the Next Steps?.....	ES-8
<b>Acronyms and Abbreviations .....</b>	<b>vii</b>
<b>Chapter 1 Introduction .....</b>	<b>1-1</b>
1.1 Feasibility Study Scope.....	1-2
1.2 Feasibility Study Approach and Organization .....	1-3
<b>Chapter 2 Description of King County Reclaimed Water Facilities and Program.....</b>	<b>2-1</b>
2.1 Context and Directives for Developing a Reclaimed Water System .....	2-2
2.1.1 Policy Framework .....	2-2
2.1.2 State Reclaimed Water Legislation .....	2-4
2.1.3 Protecting Puget Sound and Threatened/Endangered Species .....	2-4
2.1.4 Responding to Climate Change .....	2-5
2.2 Wastewater Service Area and System .....	2-6
2.3 History of the Reclaimed Water System.....	2-8
2.4 Reclaimed Water Facilities and Uses.....	2-9
2.5 Planned Facilities and Uses.....	2-10
2.5.1 Carnation Treatment Plant Wetland Enhancement .....	2-11
2.5.2 Brightwater Reclaimed Water System .....	2-12
2.6 References.....	2-13
<b>Chapter 3 Review of Current and Developing Reclaimed Water Technologies ..</b>	<b>3-1</b>
3.1 Reclaimed Water Standards .....	3-2
3.1.1 Washington State Reclaimed Water Standards .....	3-2
3.1.2 Washington State Standards Compared with Those in Other States .....	3-7
3.2 Reclaimed Water Treatment Technologies .....	3-7
3.2.1 Filtration Technologies.....	3-13
3.2.2 Membrane Bioreactors .....	3-15
3.2.3 Disinfection .....	3-15
3.2.4 Developing Technologies.....	3-18
3.3 Conceptual Treatment Trains.....	3-19
3.3.1 Capital Costs.....	3-23
3.3.2 Operations and Maintenance Cost Considerations .....	3-24
3.4 Technologies and Uses in Washington .....	3-26
3.5 Technologies and Uses in Other States.....	3-29
3.6 References.....	3-32
<b>Chapter 4 Economic Framework for Assessing Reclaimed Water Projects.....</b>	<b>4-1</b>
4.1 Distinctions Between Financial and Economic Analyses .....	4-1

---

## Table of Contents

---

4.1.1	Cash Flows Versus Benefit-Cost Analysis.....	4-2
4.1.2	Adding Other Bottom Line Values to the Equation .....	4-3
4.2	The WateReuse Foundation's Economic Framework.....	4-4
4.2.1	Initial Benefit-Cost Screening to Guide Reclaimed Water Program Development .....	4-5
4.2.2	Equity: Who Realizes the Benefits and Who Bears the Costs?.....	4-8
4.3	Conclusions.....	4-9
4.4	References.....	4-10
<b>Chapter 5</b>	<b>Review of Revenue Sources for Reclaimed Water Distribution Facilities .....</b>	<b>5-1</b>
5.1	Overview of Costs to Develop and Operate a Reclaimed Water System .....	5-2
5.1.1	Capital Costs.....	5-2
5.1.2	Operation and Maintenance Costs.....	5-3
5.1.3	Other Costs .....	5-3
5.2	Overview of Cost Recovery Options .....	5-5
5.3	Recovering Costs Through Wastewater Rates .....	5-7
5.4	Recovering Costs Through Reclaimed Water User Charges and Fees .....	5-9
5.4.1	Typical Potable Water Pricing Policies.....	5-10
5.4.2	Reclaimed Water Pricing Strategies.....	5-11
5.4.3	Forming a Reclaimed Water Utility .....	5-14
5.5	Recovering Costs Through Water Rates .....	5-15
5.6	Options for Financing and Funding Capital Costs .....	5-17
5.6.1	Historical Funding of Reclaimed Water Projects in Washington.....	5-17
5.6.2	Current Funding Sources.....	5-18
5.6.3	Funding Sources .....	5-22
5.7	Examples of Costs and Cost Recovery Methods .....	5-27
5.7.1	Carnation Wastewater Treatment Facility, King County, Washington .....	5-29
5.7.2	LOTT Wastewater Alliance, Thurston County, Washington .....	5-30
5.7.3	City of Phoenix, Arizona.....	5-31
5.7.4	Monterey County Water Recycling Projects, California .....	5-33
5.7.5	Santa Rosa Subregional Reclamation System, California.....	5-35
5.7.6	South Bay Water Recycling, California .....	5-37
5.7.7	West Basin Municipal Water District, California .....	5-38
5.7.8	St. Petersburg, Florida .....	5-40
5.8	References.....	5-41
<b>Chapter 6</b>	<b>Review of Environmental and Regional Benefits of Reclaimed Water .....</b>	<b>6-1</b>
6.1	Overview of the Types of Benefits from Using Reclaimed Water .....	6-1
6.1.1	Environmental Benefits .....	6-2
6.1.2	Social and Reliability Benefits .....	6-2
6.1.3	Financial Benefits .....	6-3
6.2	The Baseline: The Context for Considering Reclaimed Water Benefits .....	6-4
6.2.1	Defining the Baseline: Articulating the Region's Current Water Resource Challenges .....	6-4
6.2.2	How the Baseline May be Influenced by Alternative Futures.....	6-5
6.3	Climate Change and its Implications for Regional Water Resources Management .....	6-10
6.3.1	Observed Changes in Regional Climate .....	6-10
6.3.2	Projected Changes in Regional Climate .....	6-13
6.3.3	Climate Change Impacts on Regional Water Resources .....	6-14

6.3.4	The Role of Reclaimed Water .....	6-14
6.4	Ecologic Stress, Salmon, and Related Endangered Species and Habitat Issues .....	6-15
6.4.1	Impact of Low Flows .....	6-15
6.4.2	Impact of Climate Change on Flows .....	6-16
6.4.3	The Role of Reclaimed Water .....	6-16
6.4.4	Reclaimed Water Potential for the Sammamish River .....	6-18
6.5	Puget Sound Water Quality Issues and Implications .....	6-18
6.6	Conclusions .....	6-18
6.7	References .....	6-19
<b>Chapter 7</b>	<b>Review and Update of Regional Market Analysis for Reclaimed Water .....</b>	<b>7-1</b>
7.1	Previous Market Analyses .....	7-1
7.1.1	Water Reclamation and Reuse Study (1995) .....	7-2
7.1.2	Study to Identify Potential Satellite Projects (2000) .....	7-3
7.1.3	Wastewater Reclamation and Rainwater Harvesting Study (2003) .....	7-5
7.2	Approach Used in this Market Analysis Update .....	7-6
7.3	Potential Sources of Reclaimed Water .....	7-8
7.3.1	Existing Reclaimed Water Capacity, Production, and Uses .....	7-8
7.3.2	Reclaimed Water Capacity, Production, and Uses in Design or Construction .....	7-10
7.4	GIS-Based Identification of Potential Irrigation Areas .....	7-11
7.4.1	Initial Screening by Land Use Type .....	7-11
7.4.2	Screening for Proximity to Water Sources .....	7-12
7.4.3	Screening for Water Usage in Identified Parcels .....	7-12
7.5	Areas Where Reclaimed Water Could Enhance Water Resources .....	7-15
7.6	Identification of Perceptions and User Interest .....	7-15
7.6.1	Public Surveys and Focus Groups .....	7-16
7.6.2	Agency Interviews .....	7-17
7.7	Summary and Conclusions .....	7-18
7.8	References .....	7-19
<b>Chapter 8</b>	<b>Business Plan for King County's Existing and Near-Term Reclaimed Water Program .....</b>	<b>8-1</b>
8.1	Existing Reclaimed Water Program .....	8-1
8.2	Reclaimed Water Program Goals .....	8-2
8.3	Reclaimed Water Work Plan .....	8-3
8.4	Financial Aspects of Existing Program .....	8-7
8.4.1	Staffing .....	8-7
8.4.2	Reclaimed Water Revenues from South Plant .....	8-7
8.5	References .....	8-8
<b>Chapter 9</b>	<b>Next Step: Reclaimed Water Comprehensive Plan .....</b>	<b>9-1</b>
<b>Glossary</b>	.....	<b>G-1</b>

**List of Tables**

Table 1-1. Location of WRP-2 and Other Topics in Feasibility Study .....	1-5
Table 3-1. Reuse Class and Water Quality Requirements .....	3-4
Table 3-2. Required Reclaimed Water Class for Nonpotable Uses .....	3-4
Table 3-3. Advanced Treatment Technologies .....	3-10
Table 3-4. Comparison of Reclaimed Water Technologies .....	3-11
Table 3-5. Treatment Trains to Meet or Exceed Allowed Reclaimed Water Uses in Washington State .....	3-21
Table 3-6. Reclaimed Water Washington Technologies and Applications in Washington State .....	3-27
Table 3-7. Examples of Technologies and Applications in Other States .....	3-30
Table 5-1. Reclaimed Water Supply Costs and Charges (2006) Southwest Florida Management District .....	5-7
Table 5-2. Reclaimed Water Pricing Strategies .....	5-12
Table 5-3. California Reclaimed Water Rates as a Percentage of Potable Rates .....	5-13
Table 5-4. Reclaimed Water Pricing Strategies in Florida (1999) .....	5-14
Table 5-5. Summary of Reclaimed Water Rates in Florida (2005) .....	5-14
Table 5-6. Historical Grant and Loan Funding for Wastewater Treatment and Reclaimed Water Projects in Washington (through 2004) .....	5-18
Table 5-7. Grant and Loan Funding Available for Washington Reclaimed Water Projects .....	5-19
Table 5-8. City of Phoenix Wastewater and Reclamation Facilities .....	5-32
Table 5-9. Santa Rosa Subregional Reclamation System Capital Costs and Financing Sources .....	5-36
Table 5-10. West Basin Recycled Water Production and Prices Relative to Potable Water Prices (2002) .....	5-40
Table 6-1. How the Baseline for Reclaimed Water May Be Influenced by Alternative Futures .....	6-8
Table 6-2. Climate Change Building Blocks .....	6-11
Table 6-3. Salmon Bearing Streams Identified as Flow Limited .....	6-17
Table 7-1. King County Wastewater System Sources for Production of Reclaimed Water .....	7-9
Table 7-2. Potential Irrigation Demand Areas in King County's Wastewater Service Area .....	7-11
Table 7-3. Potential Irrigation Demand Areas Within 3,000 feet of Interceptors or Treatment Plants in King County's Wastewater Service Area .....	7-12
Table 7-4. Potential Irrigation Uses for Reclaimed Water in the Service Area .....	7-14
Table 7-5. Potential Irrigation Uses for Reclaimed Water Within 3,000 Feet of Interceptors or Regional Plants .....	7-14
Table 8-1. Reclaimed Water Work Plan .....	8-4
Table 8-2. Annual Revenue from South Plant Reclaimed Water Used at Fort Dent Park, City of Tukwila (2005–2006) .....	8-8
Table 8-3. Annual Potential Revenue from South Plant Reclaimed Water Used at Foster Golf Links (2008–2011) .....	8-8

**List of Figures**

Figure 2-1. King County Wastewater Service Area and Facilities .....	2-7
Figure 2-2. Conceptual Enhancement of the Chinook Bend Natural Area .....	2-11
Figure 2-3. Brightwater Reclaimed Water System .....	2-12
Figure 3-1. Treatment Processes for Reclaimed Water Classes .....	3-9
Figure 3-2. Construction Cost Curves for Treatment Trains .....	3-25
Figure 4-1. Market-Oriented Reclaimed Water Program Development – Focusing on Internal Financial Factors Only .....	4-5
Figure 4-2. Value-Oriented Reclaimed Water Program Development – Both External and Internal Economic Factors Considered .....	4-6
Figure 4-3. Example of Economic and Triple Bottom Line Analyses Combined .....	4-7

Figure 5-1. Example of Decrease in Potable Demand with Increase of Reclaimed Water Use .....	5-16
Figure 6-1. April 1 Snow Water Equivalent (1950–2000).....	6-12
Figure 6-2. January Water Temperatures in Lakes Washington, Sammamish, and Union (1933–2007).....	6-12
Figure 6-3. Projected Changes in Monthly Temperature and Precipitation in the Pacific Northwest for the 2020s and 2040s (in degrees F and percent) .....	6-13
Figure 7-1. King County Wastewater Service Area and Facilities .....	7-21
Figure 7-2. Potential Reclaimed Water Users In and Near King County's Service Area.....	7-23
Figure 7-3. Potential Reclaimed Water Users Within 3000 Feet of Reclaimed Water Sources .....	7-25
Figure 7-4. Potential Reclaimed Water Use Areas Based on Critical Groundwater Recharge Areas and Flow-Limited Streams.....	7-27

**Appendices (available on CD in back of report)**

- A. Washington Reuse Class Standards
- B. Comparison of Reclaimed Water Regulations and Standards for Selected Sites
- C. Examples of Developing Technologies in Use (CA, NV, AZ, FL, CO)
- D. Developing Reuse Technologies
- E. Washington Case Studies
- F. Construction Costs for Treatment Technologies
- G. Summary of UV Sizing and Cost Tool
- H. 2005 Annual Survey of Wholesale Customers: Summary of Results, Seattle Public Utilities
- I. Out of State Case Studies
- J. Summary of Case Studies
- K. Stakeholder Program Summary
